Industrial Maintenance Aerosols

### Brake and Clutch Cleaner

CODE: **R202**

Effective cleaning of brakes, clutches and other surfaces

This powerful cleaning fluid is used to remove oil, grease, dirt and dust from brakes and clutches, aiding in the elimination of brake squeal and clutch slip caused by glazing and contamination. Can be used on many other surfaces as a powerful cleaning agent.

**Benefits:**

- Colourless – non-staining
- Fast evaporating solvents
- Effective against grease, brake fluid, brake and clutch dust
- Can be used to remove tar spots from some surfaces
- Eliminates brake squeal and clutch slip

#### Technical Data:

**Appearance:** Colourless, volatile, free flowing liquid  
**Odour:** Solvent  
**Contents:** Blend of solvents and hydrocarbon propellants  
**Solubility:** Insoluble in water  
**Storage:** Below 50°C  
**Flash Point:** <0°C  
**Temperature range:**  
**Specific Gravity:** 0.705-0.720  
**Pack Sizes:** 12 x 400ml cans  
**Directions for Use:** Spray liberally on surface to be cleaned. Wipe off with an absorbent cloth. Test brake operation after cleaning if applicable. May affect some painted surfaces – test on an inconspicuous area first. Avoid spraying on hot surfaces or near naked flames. Always dispose of contaminated materials in a sealable container to avoid fire risk.  
**Not suitable for use on plastic or rubber components.**
